Form Designer: Attendee Groups

Omar S. - 2021-04-21 - Form Designer

Attendee Groups: The main use of attendee groups is to acknowledge a specified group of people that will be attending the event. A good example of group would be a club President and Club Member.

Click the **Add Group** button to bring up the window. Within this section the event organizer can enter in the group name and group code. When finished click the **Save** button to apply the change or click **Cancel** to close the window and not apply any changes.

Within the list the Edit ( ) icon can be used to make changes to the attendee group. The delete ( ) icon can be used to remove the group added.
