## [NOVA] How can I check someone in to a Cloud Event?

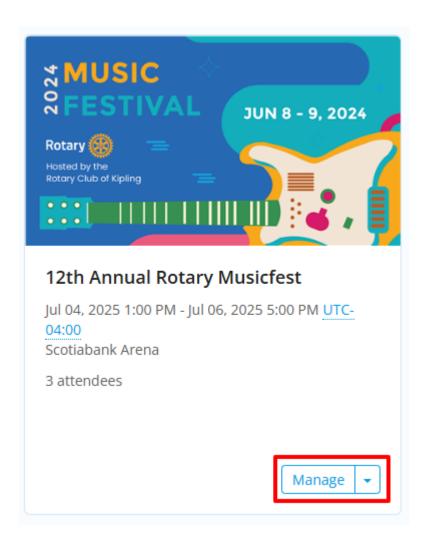

Ryan A. - 2025-10-07 - <u>Events</u>

Cloud Events allow you to check in event atendees so you have a list of everyone who attended and can perform actions based on this (such as emailing all event attendees).

- 1. Log in to your account through your club homepage, then click on **Member Area** on the top right under your club banner. <u>Alternatively, click here to go directly to the ClubRunner login page.</u>
- 2. Once logged in, click on **Events** in the left-hand side menu and select **Cloud Events**.

3. You'll see a list of your cloud events, click on the **Manage** button for the specific event you want to check in attendees for.

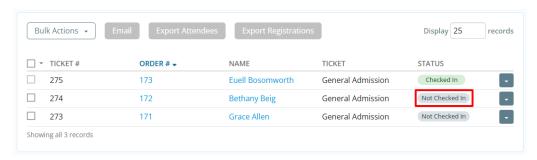

4. Once in the specific cloud event, click the **Attendees** tab to view the list of event attendees.

## 12th Annual Rotary Musicfest Live

5. On this page is a list of all event attendees that have registered for the event. You'll see a tag on each that says if they are checked in or not To check in an attendee, click on the **Not Checked In** label and it will mark that person as being "checked in".

To change an event attendee from checked in to not checked in, click the Checked In label and it will mark that person as being "not checked in".
