

How can I link my old website to the new ClubRunner site?

Michael C. - 2021-02-12 - Support

In order to point your current website to the ClubRunner website you have two options.

Option One

You can transfer your current domain name to ClubRunner, which will mean that we would administer your domain name. This will incur a charge of **\$40** per year for a minimum of 3 years, however this will renew your domain for an additional 3 years from its current expiry date. If you choose a term of 5 years or longer with us, the price is reduced to **\$35** per year for 5 years or more. You can also choose a term for 8 years or longer with us, the price is reduced further to **\$30** for 8 years or more.

1. Prior to ordering a transfer with us, you will need to initiate the transfer by following these steps:
2. Please contact your current domain registrar and have them UNLOCK your domain name so we can initiate a domain name transfer. They also need to change the Admin Email to domains@clubrunner.ca.
3. If this is not possible kindly ensure that you are able to forward to us a message that will be sent to the current email address listed as the Admin Email for the domain. The current domain registrar should also provide us an Authorization Code to initiate a domain name transfer.
4. A charge of **\$40** per year for a minimum of 3 years, or **\$35** per year for 5 or more years, will be added to your invoice. Please note that we are unable to initiate a domain name transfer until all information is received.

Note: the above fees may differ if purchasing 'non-standard' domains (i.e. not ending with .com or .org) or special country-specific domains. Please contact our team for to see if your specialized domain might incur a different cost.

Option Two

The second option you have is to enable Domain Aliasing. Clubs or Districts with their own domain names (whether registered through us or directly with a domain registrar) can not only achieve better branding and higher search engine ranks using their own URL, which will replace any reference to ClubRunner in their URL. Whereas previously, we

recommended doing a simple redirect to have your domain point to your ClubRunner homepage, you can now employ proper domain hosting techniques for better branding and visibility online.

For more detailed instructions on Domain Aliasing, please [click here](#). Your link will open in a new window.
