

How do I add a Download File?

Michael C. - 2022-09-29 - Website Content

Download Files lets you upload files from your computer to ClubRunner, so you can use them on your website or let members see them. As an example, you could put a Word Document or PDF file in Download Files and then link it in your story or a widget.

Note: Download Files are always public, exercise caution when adding files with private information.

1. To access **Download Files area** you will need to login to your member site. Once online, click on the **Website** tab on the blue menu bar.
2. Then click on **Website Content** on the grey menu bar.
3. On the Getting Started page, click on **Home Page Download Files**

Getting Started

4. This takes you to the Download Files page. From here you can **Add a Download File** by clicking on the add download file button.

- **View:** Click here to preview the content by downloading it.
- **Edit:** Use this link to choose a different file, or change the title of the download link.
- **Supporting Files:** If you upload an HTML file with embedded images, this allows you to upload those embedded images so that all the references work. This feature can be useful for users better versed in HTML coding, and is normally not needed.
- **Delete:** Remove the uploaded file from ClubRunner.

Download Files for Home Page

Drag and drop your download files to change their sequence.
