

How do I delete or restore a site page?

Michael C. - 2021-01-28 - Website Content

Once a site page is created, you can **Delete** it when no longer required. You may also **Restore** deleted pages as needed. You can access both of these functions through the **Site Page Library** on your club or district site.

1. To access the **Site Page Library**, log in to your ClubRunner home page and access the Member Area.
2. Click on the **Website** tab.
3. Click on the **Website Content** link.
4. On the left-hand side of the screen, click on **Pages**
5. Click on **Site Page Library**.

Getting Started

Custom Pages / Site Pages

This section allows you to create additional pages for your website.

A **Custom Page** is a standalone, single page that can be linked to from the menu or any Links Widget. The content and layout of custom pages can be designed just like your home page, using the Page Designer.

A **Site Page** is a convenient way to create multiple pages in a section of your website. Use this to create a subsite, with its own side navigation menu to include links, files, subpages and related (nested) site pages.

Both Custom Pages and Site Pages have a standard widget which lists selected pages and can be included on the home page.

To add, edit, or delete pages currently appearing on the home page, click on the sections below:

To add, edit, or delete pages in your library, click on the library sections below:

6. This brings you to the **Site Page Library**, a complete list of currently created site pages. Simply select the site page you wish to delete, and click the **Delete** link under the **Actions** heading.

Site Page Library
