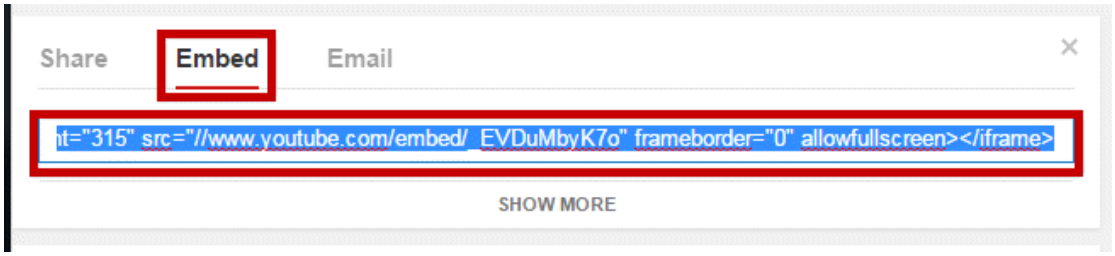
How do I embed a Youtube video into a story or custom widget?

Omar S. - 2023-09-19 - Stories & Online Editor

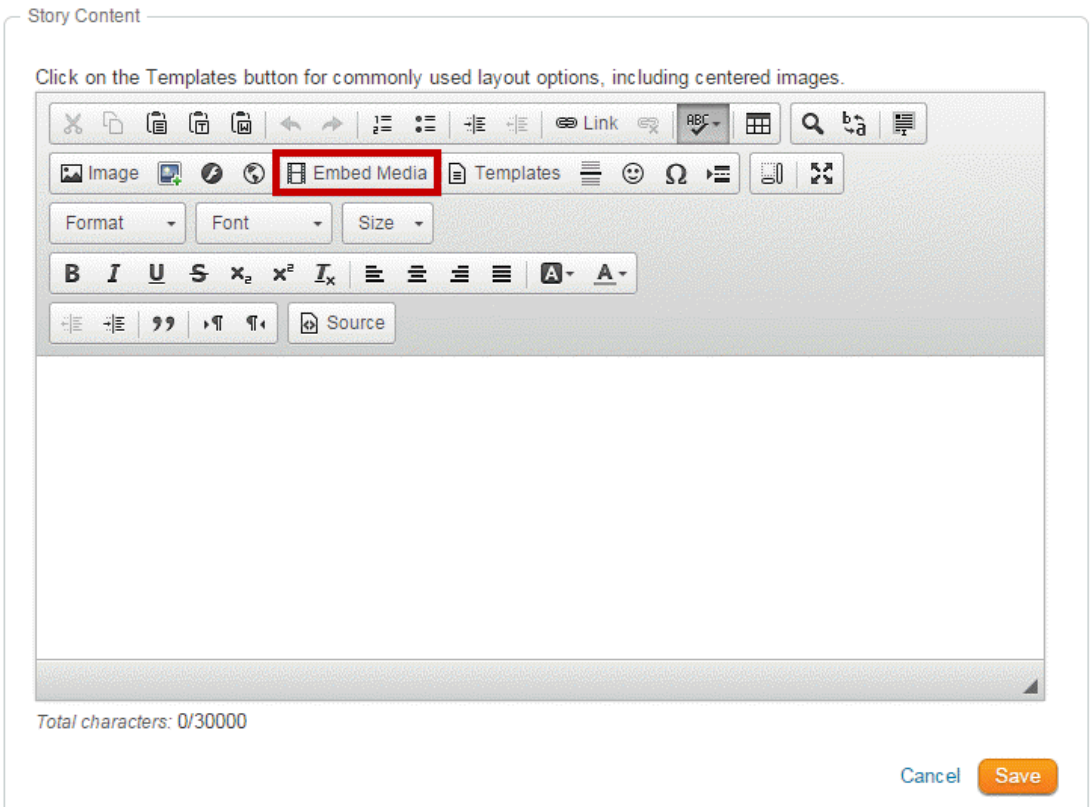
You can add a YouTube video to a webpage or bulletin story using the steps details below.

1. First, go to Youtube and find the video you wish to embed. Then, click on the **Share** link, located below the video.

1. Next, click on the **Embed** link. Right-click on the code that appears and copy it.



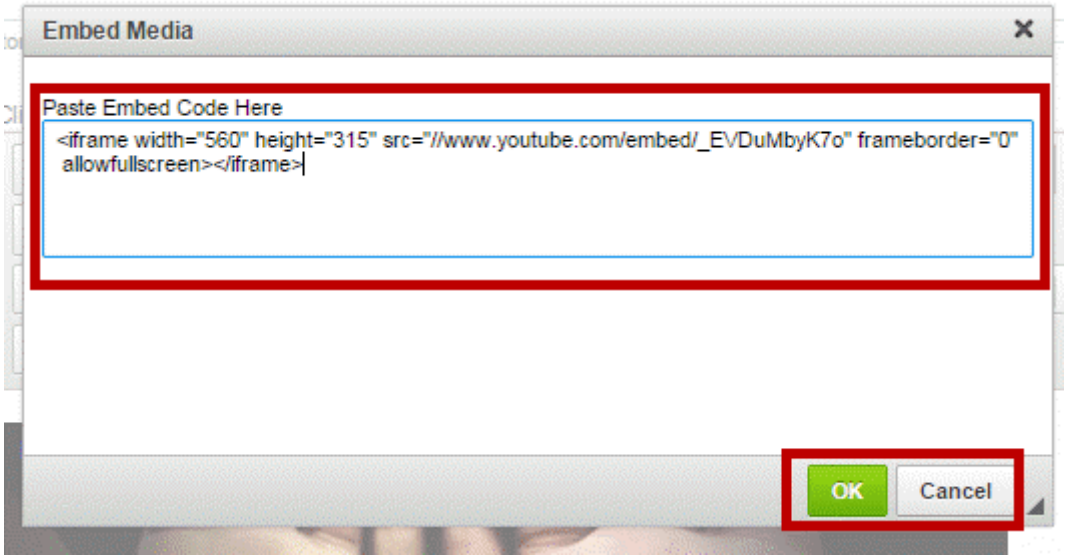
1. Return to your story or widget and click on the **Embed Media** button.



Note

If you are embedding the content on a **Custom Page** or the **Home Page**, drag-and-drop a **Custom Widget (Global)** or **Custom Widget (Page Specific)** into a one of the live designer layout sections, then hover-over the widget and click the **Outbound Arrow** icon. This will open the editor which includes the **Embed Media** editor tool. [Learn more about the website live designer from our 7 minute Live Designer Basics Tutorial.]

1. A blank **Embed Media Dialog** window will appear. Right click and paste the video URL in the open space provided. When the code is pasted, click the **OK** button.



1. Your video will now appear within the body of the story or widget.
