How do I make an image a clickable link?

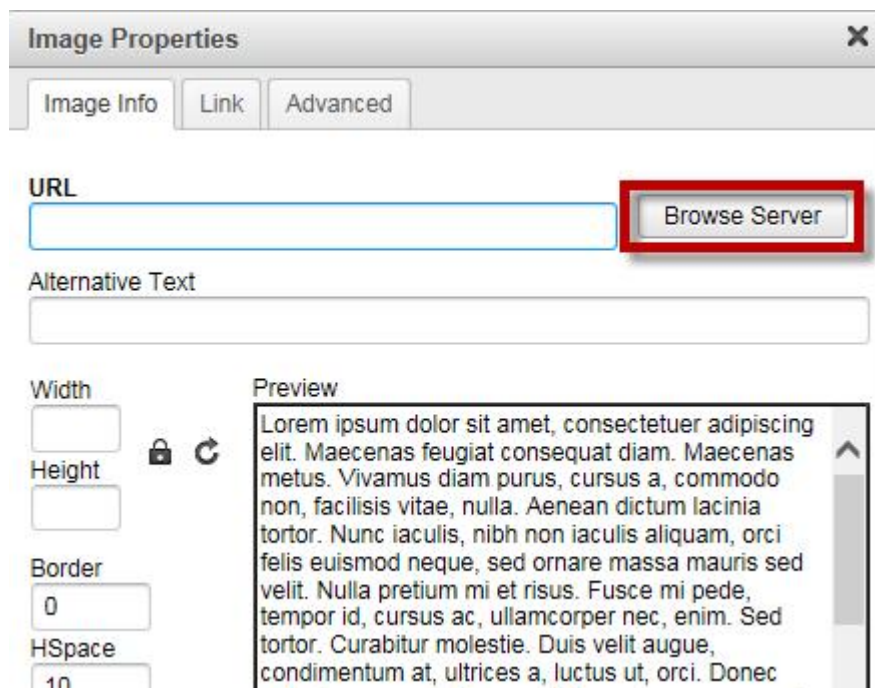

Omar S. - 2021-03-05 - Stories & Online Editor

If you have embedded an image into a story or custom page, you can turn that image into a clickable link. To do so, open a story or custom widget and follow the below steps:

1. Click on the **Image** icon in the editor toolbar.

2. Now click on the **Browse Server** button

3. The **Media Library** should appear in a new window. Select your image from the folders, and double click on it.

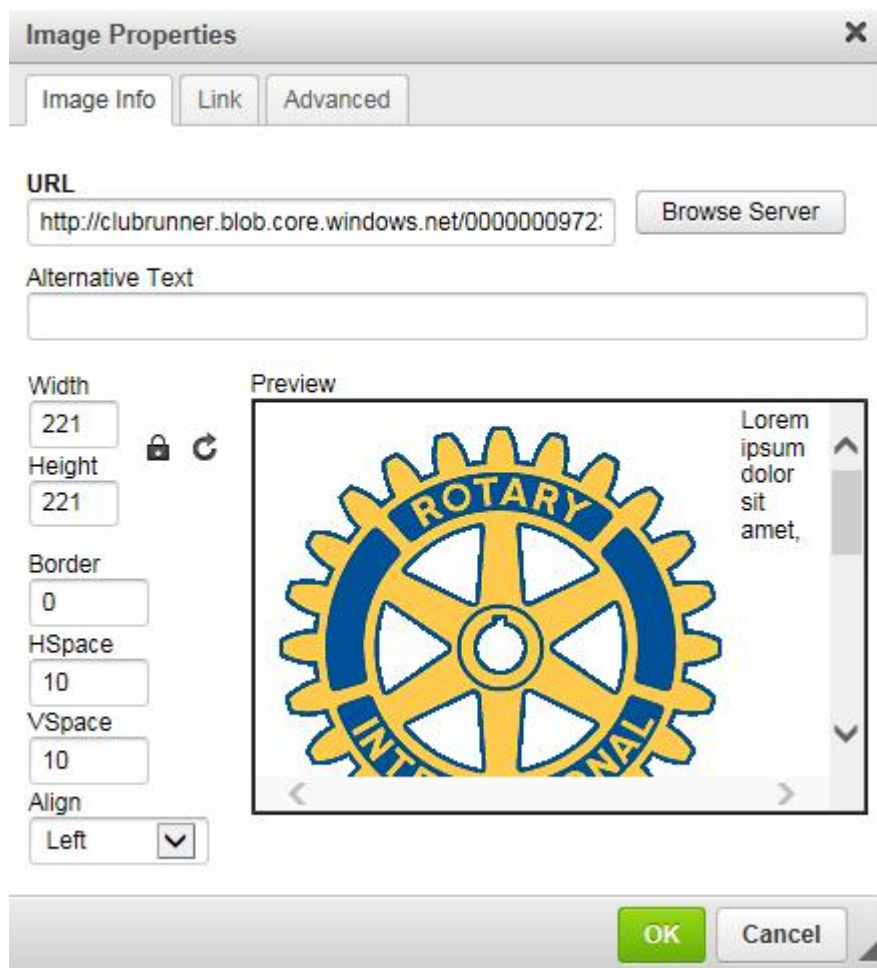

Media Library

To select an image from any library, **double click** on the thumbnail.

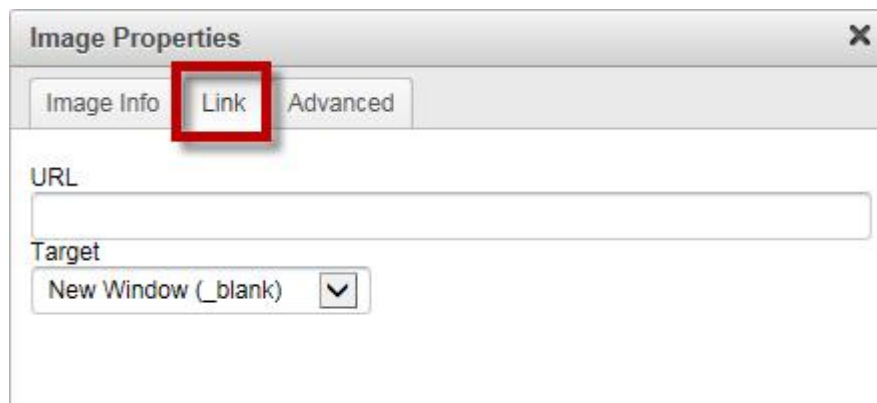

Note that the first two folders are shared libraries and images cannot be uploaded to your own website's library and can be customized. To upload a new image, click on the top.

Maximum file size for upload is 10.00 MB.

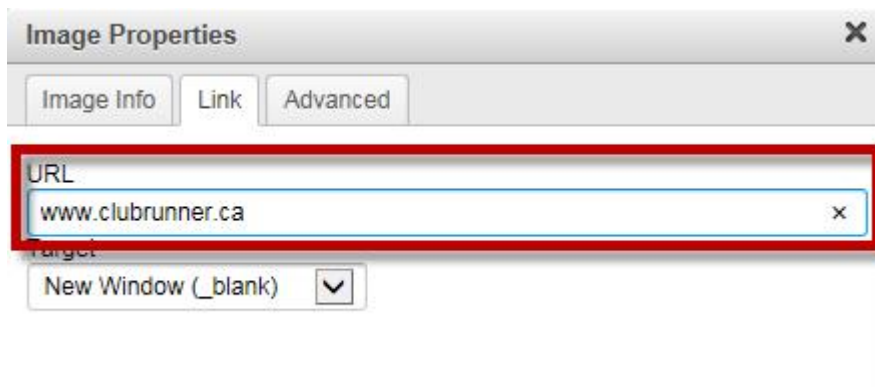

The screenshot displays a web-based media library interface. On the left, a 'Folders' panel lists three folders: 'ClubRunner Images (locked)', 'Rotary Images (locked)', and 'My Images'. The 'My Images' folder is selected. The main area shows a grid of image thumbnails. A context menu is open over a thumbnail of a yellow sun logo, listing options: 'Select', 'View', 'Download', 'Rename', and 'Delete'. The 'Download' option is highlighted. The menu also shows a file name 'clublogo-12/17/2017' and a 'Delete' button with a red minus sign. At the top of the interface, there are buttons for 'Upload', 'Refresh', 'Settings', and 'Maximize'. Another thumbnail of a baseball is visible to the right, with a file name 'Graphic.png' and a timestamp '4 8:18 PM'.

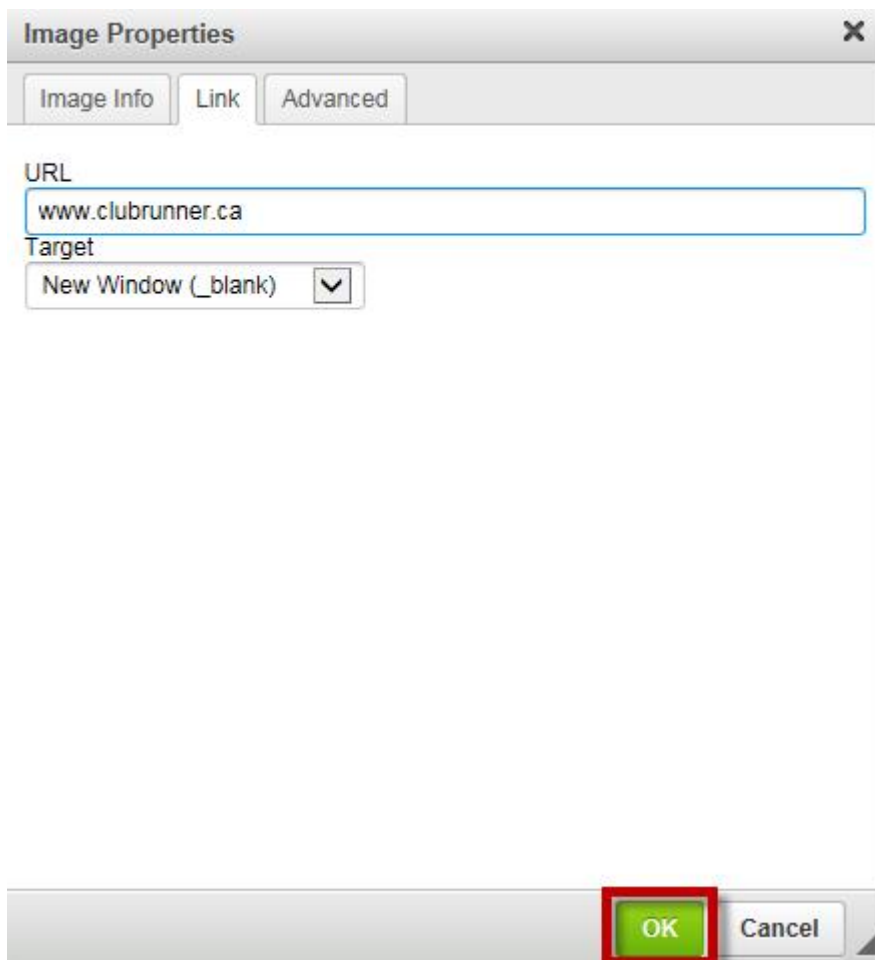

4. Now back at the **Image Properties** window click on the **Link** Tab

5. Enter the **URL address** that you want the image to link to. Eg: www.ClubRunner.ca

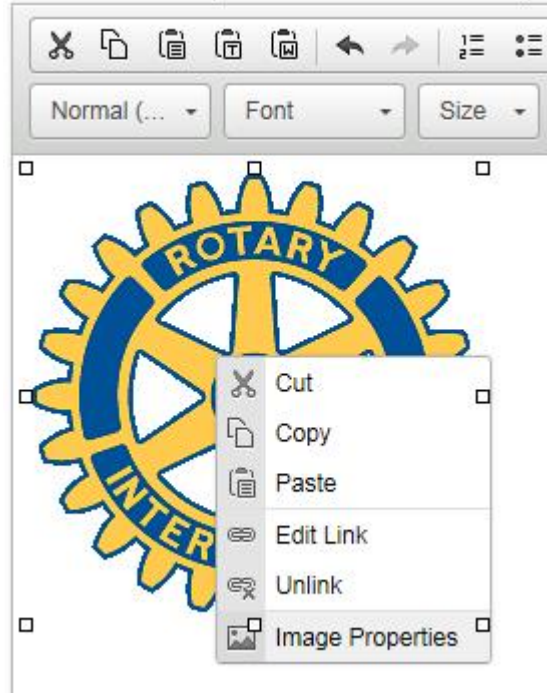

6. Now click the **OK** button.

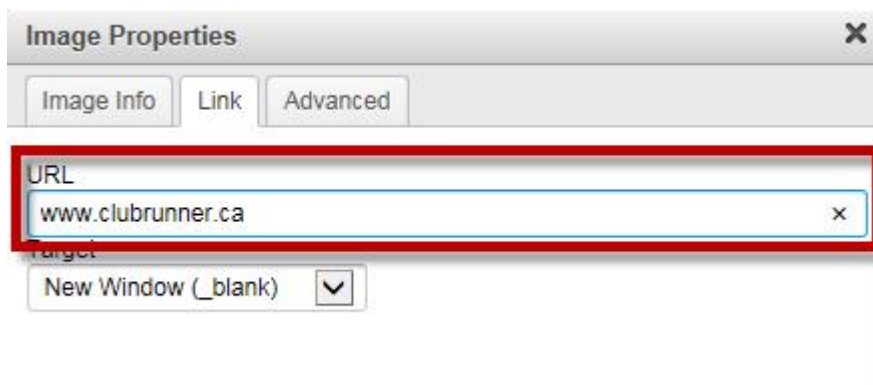

7. If you want to turn an existing image into a clickable link, right-click on the image and select **Image Properties** from the drop-down menu that appears.

Click on the Templates button for commonly u

8. In the **Link** field of the **Image Properties** window, enter the appropriate URL.

9. Click **OK** to save.
