How do I record a HAR log file for troubleshooting?

Michael C. - 2021-02-11 - Support

Occasionally, you may run into an issue within ClubRunner that requires assistance from our Support team. In some circumstances, our team may ask for you to provide us with a .HAR log file.

A HAR log file will provide our support team with additional information in regards to network activity that has occurred within your browser.

**Note:** A HAR log file can contain sensitive data and information, which includes content and cookies of the pages you have visited while recording. The log file can also contain personal information that you submitted while recording (eg. personal details, passwords, credit card numbers).

Some browsers have may have different methods of creating a HAR log file. It is always recommend to check with your own browsers own documentation, but below are some instructions you can follow for various browsers

- Google Chrome
- Mozilla Firefox
- Microsoft Edge
- <u>Apple Safari</u>

## How to generate an HAR log file with Google Chrome

- 1. Open Google Chrome and navigate to the page your issue is occurring on.
- Look for Google Chrome options menu, which should look like three vertical dots, and select More Tools, and then Developer Tools

3. The developer panel should now open. Click on the **Network** tab.

4. On the left hand side of the panel, locate a red or grey circle. If it is grey, click on it to begin recording.

 Ensure that you select the **Preserve Log** option to keep the data logged when navigating between pages and clear the current log to remove any existing logs from the Network tab.

- 6. Reproduce the issue that you have been experiencing while recording the network requests.
- After you have been able to reproduce your issue, right click anywhere within the list of network requests, and select **Save all as HAR with Content** to save the log file to your computer.

 Upload and send the downloaded HAR log file in an email to our support team at support@clubrunner.ca

#### How to generate an HAR log file with Apple Safari

- 1. Open Safari and go to the webpage where you are having the issue with.
- You may need to enable the "Develop" top menu. To enable Develop Tool go to the top left menu item "Safari" > "Preferences" > "Advanced" > click the option "Show Develop menu in menu bar"

3. Now select "Develop" in the top menu > then "Show Web Inspector"
