5. There are several different **Statuses** that an email address could have:
 - **Sent** - The email was sent to the recipient. The email could have been opened, but not reported as opened due to anti virus blocking the notice of it being opened.
 - **Opened** - The email was opened. This could be false, the anti virus could have

opened it to check the email and the recipient never opened it. Or the anti virus or email client could have blocked the message coming back to us saying the email was opened. To learn more about email tracking please read the article about [email tracking](#).

- **Dropped** - The email was not sent because the email is on the blocked list.
- **Bounced** - The email was not received because an error was returned by their email service. Eg. email address does not exist.
- **Blocked** - The email was not received because their email service blocked the email.
- **Spam** - The recipient reported this as spam. They will no longer receive future emails sent from ClubRunner.
- **Unknown** - The recipient was sent the email, but the system does not know if the recipient received it or not.
