How to add and remove Cloud Event organizers

Michael C. - 2025-10-16 - Events & Calendar

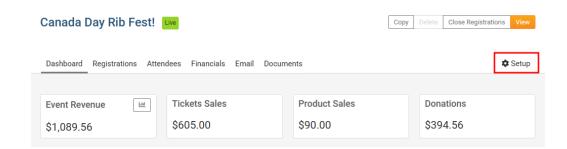

Event Organizers allow your organization to provide a point of contact for your events hosted through ClubRunner and allow non-administrators to manage individual events without providing them with a greater level of access than necessary. This allows events to be largely controlled by individual members who have been assigned as an event organizer.

Adding a new Event Organizer

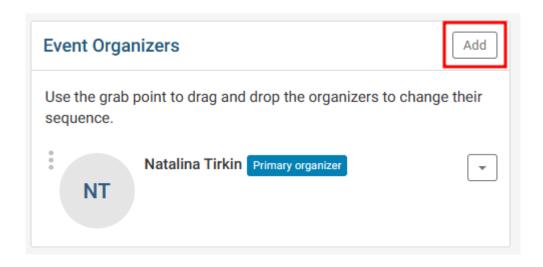

Note

After adding a new event organizer to an event, a confirmation email will be sent to the organizer's provided email address. Future updates to the organizer's **Organizer Role** setting will prompt additional emails to confirm the changes.

- To access Cloud Events, you must go to your website's homepage and log in. For more information on how to log in, click here.
- 2. After logging in and navigation to the **Member Area**, you will see several tabs along the top of the screen. Click on the **Events** tab, and then click on **Cloud Events**.
- 3. Click the Manage button on the event you would like to add an organizer to.
- 4. At the top right of the event page, click \mathbf{Setup} or the \mathbf{Gear} icon to begin editing the event.

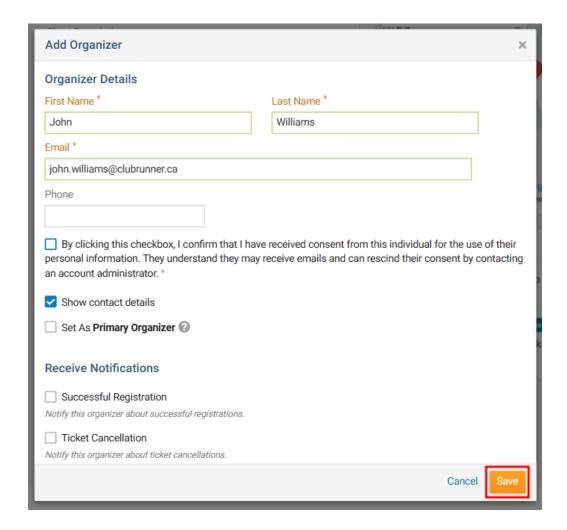

Under the Event Organizers section, click on the Add button to open the Add Organizer window, where you may enter the organizer's details.

- 6. The Add Organizer window will appear, providing several options to configure the new event organizer:
 - Existing Contact Allows you to search and select a member of your organization as the event organizer.
 - Custom Allows you to manually add a non-member as an event organizer by providing their contact details. Non-member organizers are unable to be provided an Organizer role, because they cannot login.
 - First Name (Required) Custom event organizer's first name.
 - Last Name (Required) Custom event organizer's last name.
 - Email (Required) Custom event organizer's email address.
 - **Phone** Custom event organizer's phone number.
 - **Checkbox to confirm consent** (Required) Check this to confirm you have the person's consent to add them as an event organizer and to save their information into the system.
 - Show contact details Determines whether an event organizer's contact details will be shared with the public on the event registration page.
 - o Set as Primary Organizer Sets the event organizer as the event's default point of contact.
 - Receive Notifications Allows you to customize which event notifications the event organizer will receive.
 - Successful Registration Notifies the organizer about successful registrations.
 - **Ticket Cancellation** Notifies the organizer about ticket cancellations.
 - **Order Cancellation** Notifies the organizer about order cancellations.

- **Refund Issued** Notifies the organizer about issued refunds.
- Payment Received Notifies the organizer about received payments.
- After configuring the new event organizer, click the Save button to finalize your changes. Alternatively, click cancel to go back.

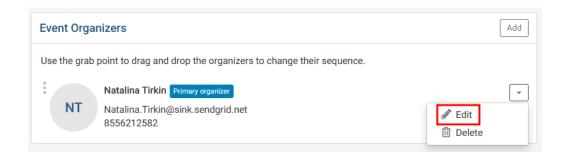

Editing an existing Event Organizer

- 1. To access **Cloud Events**, you must go to your website's homepage and log in. <u>For more information on how to login, click here.</u>
- 2. After logging in and navigation to the **Member Area**, you will see several tabs along the top of the screen. Click on the **Events** tab, and then click on **Cloud Events**.
- 3. Click the Manage button on the event you would like to edit the organizers for.

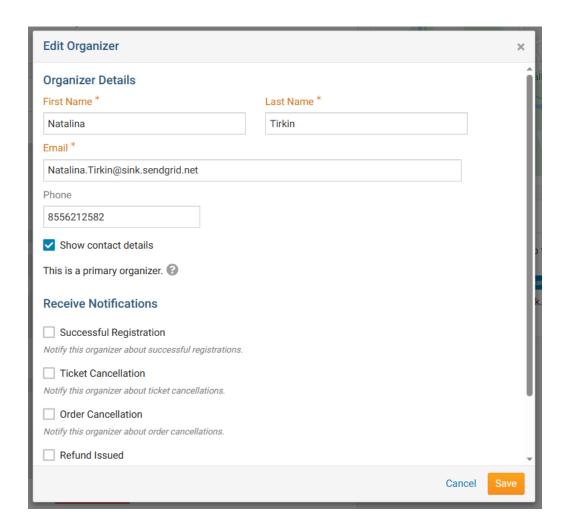

- 4. At the top right of the event page, click **Setup** or the **Gear** icon to begin editing the event.
- 5. Under the Event Organizers section, click on the **dropdown arrow** on the same line as the event organizer.

6. Within the dropdown menu options, click **Edit** button to open the Edit Organizer window.

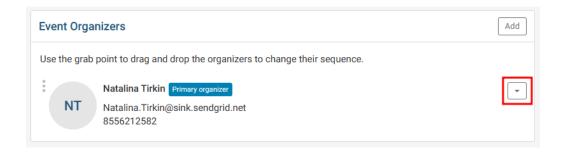

7. The **Edit Organizer** window will appear where you can make the necessary adjustments. Click the **Save** button to finalize your changes.

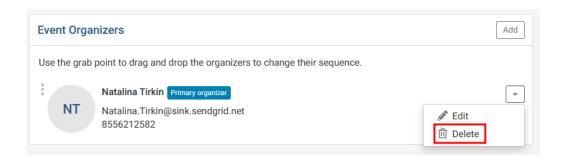

Removing an Event Organizer

- 1. To access **Cloud Events**, you must go to your website's homepage and log in. <u>For more information on how to login, click here.</u>
- 2. After logging in and navigation to the **Member Area**, you will see several tabs along the top of the screen. Click on the **Events** tab, and then click on **Cloud Events**.
- 3. Click the Manage button on the event you would like to add an organizer to.
- 4. At the top right of the event page, click **Setup** or the **Gear** icon.
- 5. Under the Event Organizers section, click on the **dropdown arrow** on the same line as the event organizer.

6. Within the dropdown menu options, click **Delete** to delete the selected organizer from the event.

7. A confirmation window will appear. Click \mathbf{OK} to confirm and remove the organizer.
