[NOVA] How do I generate a QR code for a page on my club site?

Michael M. - 2026-06-12 - [Website](#)

You can create custom QR codes for any individual page or file within the system. This allows you to generate scannable codes for event registrations, sign-up forms, and portals, making it easier to share digital links on printed materials or flyers.

1. To begin, log in to your account through your club homepage, then click on Member Area on the top right-hand corner under your club banner. [Alternatively, click here to go directly to the ClubRunner login page.](#)
2. Scroll down to the Website Content dashboard and click **Generate QR Code**.

Website Content

Expand your digital reach with current and relevant content to engage your members.

3. On the following page, click the Link Type drop-down menu to select the type of link you would like to generate a QR code for. You will have the option to select from any page in your club site, specific documents or download files, or can even generate a QR code for an external page with a custom URL.

Link

| | |
|-------------------------|-------------------------|
| Link Type | Built-in Page |
| Pages: | Built-in Page |
| QR Size | Custom Page |
| Image Size (pixels) | Custom URL |
| 150 | Document |
| Enter a size between 50 | Donation Campaign |
| Logo (Optional) | Event |
| Logo Link Type | Form |
| Logo Image URL | Home Page Download File |
| | Photo Album |
| | Public Signup Lists |
| | Site Page |
| | Speaker |
| | Story |

- Once you've selected the Link Type, you can select the specific page or file from the next drop-down menu.

Link

| | |
|-----------|---------------|
| Link Type | Built-in Page |
| Pages: | Contact Us |

If you chose the Custom URL option, enter the web address of the page you wish to generate the QR code for.

Link

| | |
|---------------|------------|
| Link Type | Custom URL |
| Web Address * | |

- Email links must start with "mailto:". Example: mailto:email@example.com
- Relative links must start with "/". Example: /Calendar/Events
- Absolute links must start with "https://". Example: https://www.google.com

5. Choose a pixel size for the generated QR code by entering a number between 50 and 1000 into the QR Size field.

QR Size

Image Size (pixels)

Enter a size between 50 and 1000 pixels.

6. You have the option to add an image to appear in the middle of the QR code, to further customize or brand your code. Enter a direct URL if you would like to use an online image, or click **Load from Image Library** to select an image that is already in use by your club.

Logo (Optional)

Logo Link Type

Logo Image URL

[Load from Image Library](#)

Provide a link to a logo image to display in the center of your QR code. For the best fit, use a square image (1:1 aspect ratio).

You may also click the Logo Link Type drop-down menu and select the **Image / Logo** option to choose from one of your available club logos.

Logo (Optional)

Logo Link Type

Logo

7. When you have finished choosing your settings, click **Generate QR Code**.

Logo (Optional)

Generated QR Code Links

Image URL

<https://clubrunner.blob.core.windows.net/00000017649/QrCodes/65...>

Use this URL to share or display the saved QR code image.

Destination URL

<https://portal.clubrunner.ca/17649>

Use this URL to open the web address encoded in the QR code.

9. You may now include the QR code on your club site, add it to email communications, and more!
