

What are the Donations settings?

Michael C. - 2021-03-23 - Donations

In order to get started with the donation module, the module will need to be configured through the setting page. This article will cover the different settings available within the donation module and how they are used.

Note: In order to setup the donation module, the organization must already have a Bambora or Paya account integrated within ClubRunner. If the organization does not currently have this setup, please contact our [ClubRunner Support team](#) for more information.
