ClubRunner

What is the difference between "Read Only" and "Read and Update" RI Integration

Omar S. - 2021-03-10 - Overview

Rotary International offers two options for Integration: **Read Only** and **Read and Update**. ClubRunner was originally designed with full Read and Update access in mind. The Read Only option is very new, and we're working with Rotary International to better support it.

When a Club is in Read Only mode full integration functionality will not be available. Since ClubRunner only has access to view your data, we cannot push changes made in ClubRunner up to Rotary international. You can still use tools like Compare and Sync to pull changes down to ClubRunner.
