What is the difference between Yearly and Standing committees?

Omar S. - 2021-03-04 - Committees

Yearly Committees
These are committees formed for your club for only the current Year. If you need to carry the information from a specific committee over to another year, click on the link “Carry this committee over to next year”. This will result in all members and their contact information duplicated for the following Rotary year.

Note: Any documents posted or emails sent in the previous year will not be carried over.

Standing Committees
These are committees that are always in existence in your club, and do not have an associated year. This information will carry over from year to year.
