Widgets: Organization Links

Zach W. - 2021-02-08 - Website Widgets

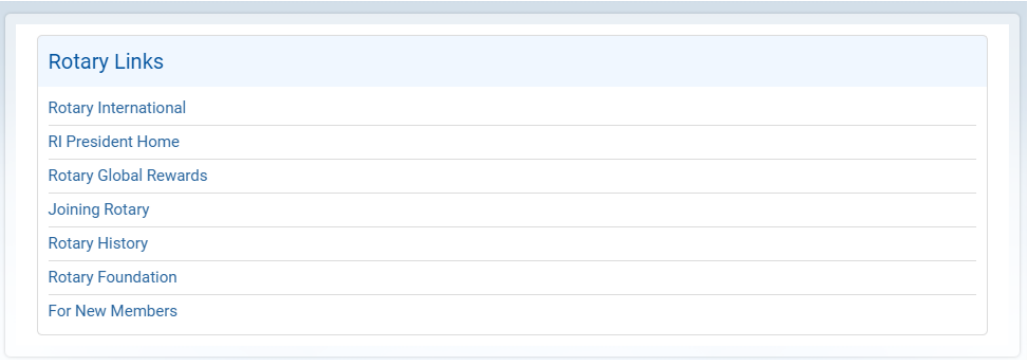

You use widgets to add content (such as stories, links and upcoming events) to your bulletin or web page. They are essential design features, and each one has a different function. In this article we'll take a closer look at the **Organization Links** widget. This widget is designed specifically for your organization, and provides links to organization resources online.

Note: The name of this widget may vary according to the name appropriate for your organization. For example, if you are a member of the Rotary Club, this widget would be called **Rotary Links**

1. To access any widget, you need to be logged into your webpage. Then, access the relevant content editor, either for your website or bulletin.

2. Once you have opened the content you wish to edit, you can access the **Organization Links** widget on the left side of the screen. It is located under the **Bulletin & PR** widget tab.

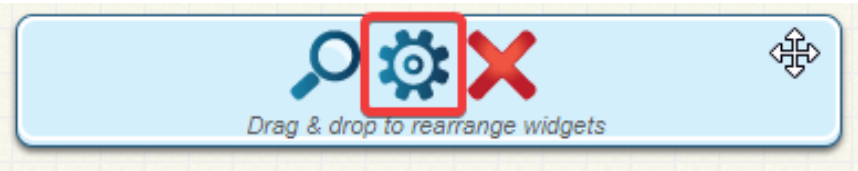

3. One in place and published, the **Organization Links** widget places a list of links to appropriate resources on the page. These can be internal pages or external links. In the example below, the links are all for Rotary Club resources.

Editing Widget Properties

Each widget has a function that permits you to edit the widget properties. Most widgets have standard properties, but some have special rules.

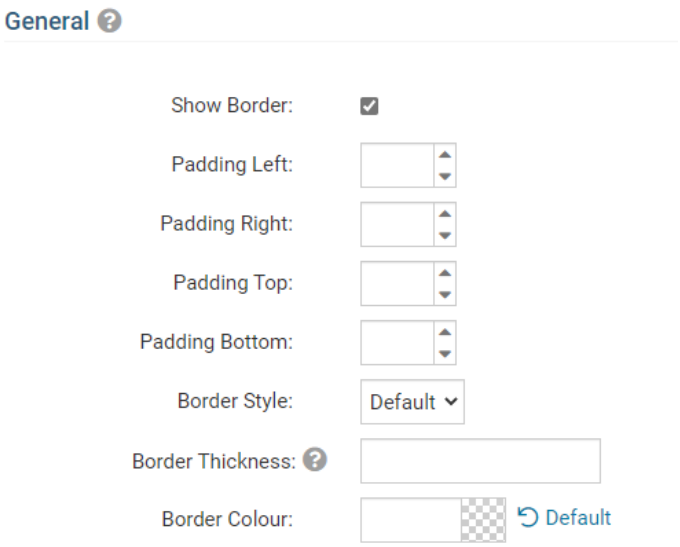

1. To access the widget properties, hover your mouse over the widget once it is in place. Click on the Gear icon when it appears.

2. You may now edit categories under the various headings. Under the **General** category you can edit spacing and border properies for the widget's border.

    - **Show Border:** Click this check box if you wish to display a border around the widget.
    - **Padding Left:** Enter a value in pixels to set a space to the left of the widget.

- **Padding Right:** Enter a value in pixels to set a space to the right of the widget.
- **Padding Top:** Enter a value in pixels to set a space above the widget.
- **Padding Bottom:** Enter a value in pixels to set a space below the widget.
- **Border Style:** Use this drop-down menu to choose a border style.
- **Border Thickness:** Enter a number to change the border setting. Leave blank to set the default.
- **Border Colour:** Click on the colour choice window to set a border colour.

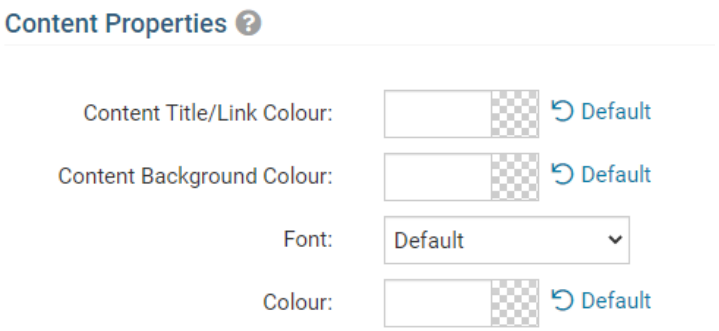

3. In the section marked **Header Properties** you may customize the appearance of the widget title.

   - **Title:** Use this field to enter a new title for the header. This will not change the title of the widget, but rather the heading under which the widget is displayed. You may edit the style and appearance of the text with the format options link to the right of the title field.
   - **Show Title:** Uncheck this box if you do not wish to display the title.
   - **Font**: Select the font type for the title.
   - **Colour:** Select the colour of the title font.
   - **Background Colour**: Use this colour selection box to set the background of the font.

4. In the **Content Properties** section, you may define the colour of the Speaker link text and any other links.

   - **Content Title/Link Colour:** Use this colour selection menu to define the colour of the Speaker link text.
   - **Content Background Colour:** Use this colour selection box to set the background colour.
   - **Font:** Choose a font to use for content text.
   - **Colour**: Select the colour of the content font.

5. If you wish to get a sneak peek of your formatting changes, refer to the **Preview** window on the right side of the screen. To see updates, click the **Refresh** button.

   Note: The Preview button displays placeholder content that reflects your style changes, and not the actual content of your widget.
