[Resolved] Service Interruption - Delayed Rendering / Website Updates

2022-11-11 - Mickey D. - Service Issues

Last night between approximately 6-10pm NAET our team identified a slowdown in processing website updates due to heavy traffic. Any updates to websites and bulletins would have been delayed during this period.

We apologize for any inconvenience this may have caused.

Our team was able to identify this issue and a resolution was implemented around 10pm NAET. Please note that any delayed website updates have been processed, and our service has returned to normal. Our team will continue to monitor for any issues.

If you have any questions don't hesitate to contact our support team.
