ClubRunner

Rotaract club integration beta now available in ClubRunner

2022-12-08 - Mickey D. - Product Updates

We are excited to announce that ClubRunner now supports Rotaract club integration on both the club and district level, in the same way we support Rotary club integration.

Now when a Rotaract club sets up RI Integration, this will enable an automatic member data sync with MyRotary.org. This includes member updates such as newly added members, profile edits and member terminations.

To learn more about how to enable this feature, click below.
