ClubRunner

The ClubRunner Nova District Sandbox is Live!

2026-04-17 - Michael C. - Announcements

Nova has already transformed the way clubs operate and now we're bringing that same experience to districts. We are thrilled to announce that the District version of the ClubRunner Nova sandbox is officially available for testing.

Be among the first to get your hands on the latest version, purpose built for districts!

What is Nova?

Nova is our most significant platform update yet, re-imagining the way districts and clubs manage their operations, engage their members, and drive impact, all in a modern, intuitive experience. Here's a look at what's coming:

- **District-wide Visibility** - A unified view of club and member data across your entire district, with smarter navigation that puts what you need front and center.
- **District Financials (New!)** - Create and send invoices directly to clubs and members without ever leaving ClubRunner. Whether it's bulk invoices for annual dues or a one-off charge, it's all handled in one place.
- **Cleaner, Smarter Interface** - A modern design that surfaces only what's relevant to you, so you spend less time hunting and more time doing.
- **Business Directory** - Members can now showcase their businesses district-wide, deepening community connections and adding real value to membership.
- **Smart Lists** - Build custom email segments to reach exactly the right people with exactly the right message.

What is a Sandbox?

The Sandbox is a safe, test environment where you can explore everything Nova has to offer using sample data, with no real member information involved. It's your space to get comfortable with the platform and share feedback that will help shape the final experience.

How to Get Access

To get started, submit a ticket for our support team, or send an email to support@clubrunner.ca, containing your name, club and district, and we will create a unique login for you!

Join our Live Webinar
