ClubRunner

Update to the latest version of the ClubRunner mobile app!

2020-11-16 - Zach W. - Product Updates

As our renovation efforts continue, our mobile app infrastructure was next on the list for updates. This update to our mobile backend systems also required changes in how the mobile app communicates with ClubRunner.

The latest update of the Mobile app includes infrastructure updates to improve performance and stability, in addition to various bug fixes. The new version of the ClubRunner app will be available later today in both the Apple App Store & Google Play.

You can continue to use the ClubRunner app without downloading its latest version until **December 14th, 2020**. After this date, older versions of the app will no longer be supported.

For assistance with app updates, please see each platform's guides:

- Apple Devices
- Android Devices

Please ensure your app is updated prior to December 14th, 2020!
